PROFESSIONAL SUMMARY

Junior Software Developer with hands-on experience building real-world web applications using React and JavaScript. I developed a full-stack agricultural price tracking system (eHAHIRO) integrating APIs and database management. Strong foundation in backend development and RESTful APIs, with growing experience in Node.js and modern frameworks. Eager to contribute to real-world software projects and continuously improve technical skills.

TECHNICAL SKILLS

Languages:

- Python, JavaScript, PHP , HTML & CSS,

Frameworks:

- Flask, Express.js

Tools & Technologies:

- Git, GitHub, Supabase, Linux

Databases:

- PostgreSQL (basic), MySQL

Concepts:

- REST APIs, Web Application Development, Machine Learning basics

PROJECTS

Agri-Price Tracker (eHAHIRO)

- Built a full-stack web application to track agricultural market prices
- Designed and implemented backend APIs for data handling
- Integrated Supabase for database management and storage
- Developed frontend interface for user interaction and data visualization
- Focused on solving real-world challenges for farmers and market access

AI Crop Disease Detector (in progress)

1. Built an image classification system for detecting crop diseases
2. Applied machine learning techniques using Python
3. Focused on cassava and maize crops

EDUCATION

Rwanda Polytechnic (RP), Kigali

Diploma in Information Technology

Year 1 (Current)

Glory Academy

Advanced Level Certificate (A-Level) – Networking and Internet Technology

Completed: 2025

CERTIFICATIONS

- Digital Talent Program (DTP) – Software Development Track

Rwanda ICT Chamber / IHS Towers

(Beginner & Intermediate completed, Advanced in progress)

ADDITIONAL INFORMATION

- Strong interest in backend systems and scalable applications
- Comfortable working in Linux environments
- Fast learner with ability to adapt to new technologies
